

*AMENDMENTS TO THE ABSTRACT*

Replace the Abstract with:

~~This invention relates to an~~ An automotive vehicle ~~featuring features~~ a body (10), an interior trim (20) attached to the body (10), an airbag (30) usually located between the body (10) and the interior trim (20), ~~means of~~ a mechanism for inflating ~~said the~~ airbag (30) in case of impact, and at least one guide strap (31), typically extending between the body (10) and the interior trim (20), where one end (311) of ~~said the~~ guide strap (31) is attached to the body (10), and the other end (312) is attached to the airbag (30), so that when the airbag (30) inflates, it is deployed toward the inside of the vehicle compartment, drawing the strap (31) along with it. ~~According to the invention, the~~ The vehicle includes ~~means of a mechanism for~~ separating the interior trim (20) from the body (10) when the airbag (30) is inflated[[,]] in order to facilitate the deployment of the strap (31).
